FAM PRACTICAL QUESTION (22593)

Practical No.: 10

1. What is Spam Filtering?
2. What is Spam and spam email?
3. What is purpose of email spam filtering?
4. Explain working of spam filtering.
5. What are the techniques used to filter out spam emails?

Practical No.: 11

1. What is Regression in machine learning?
2. What is Linear Regression?
3. What are the types of Linear Regression? Explain in detail.
4. Write characteristics of regression
5. Write advantages and disadvantages of regression.
6. Explain any 5 regression algorithm.

Practical No.: 12

1. Explain Multiple Linear Regression in detail.
2. What is overfitting & underfitting ?
3. Write techniques to reduce overfitting and underfitting.
4. Explain Implementation of Multiple Linear Regression model.
5. Write applications of Multiple Linear regression.
6. What is classification? Explain types of classification.
